Introduction

Introduction

Since 2020, we have been committed to providing high-quality products and services with competitive pricing, timely delivery, and precise execution.

By partnering with global manufacturers, we ensure the best value and top-tier quality. As an authorized agent for several international brands, PT Misuba Guna Indonesia delivers reliable solutions tailored to our customers’ needs.

Our growth is driven by the trust of our suppliers and clients, and we remain dedicated to maintaining that trust. Built on trust, driven by excellence, we will continue to be your dependable and forward-thinking supplier.

Our Strength

-  Passion
-  Guiding
-  Persistent
-  Hardwork
-  Planning
-  Service
-  Control
-  Positive Thinking

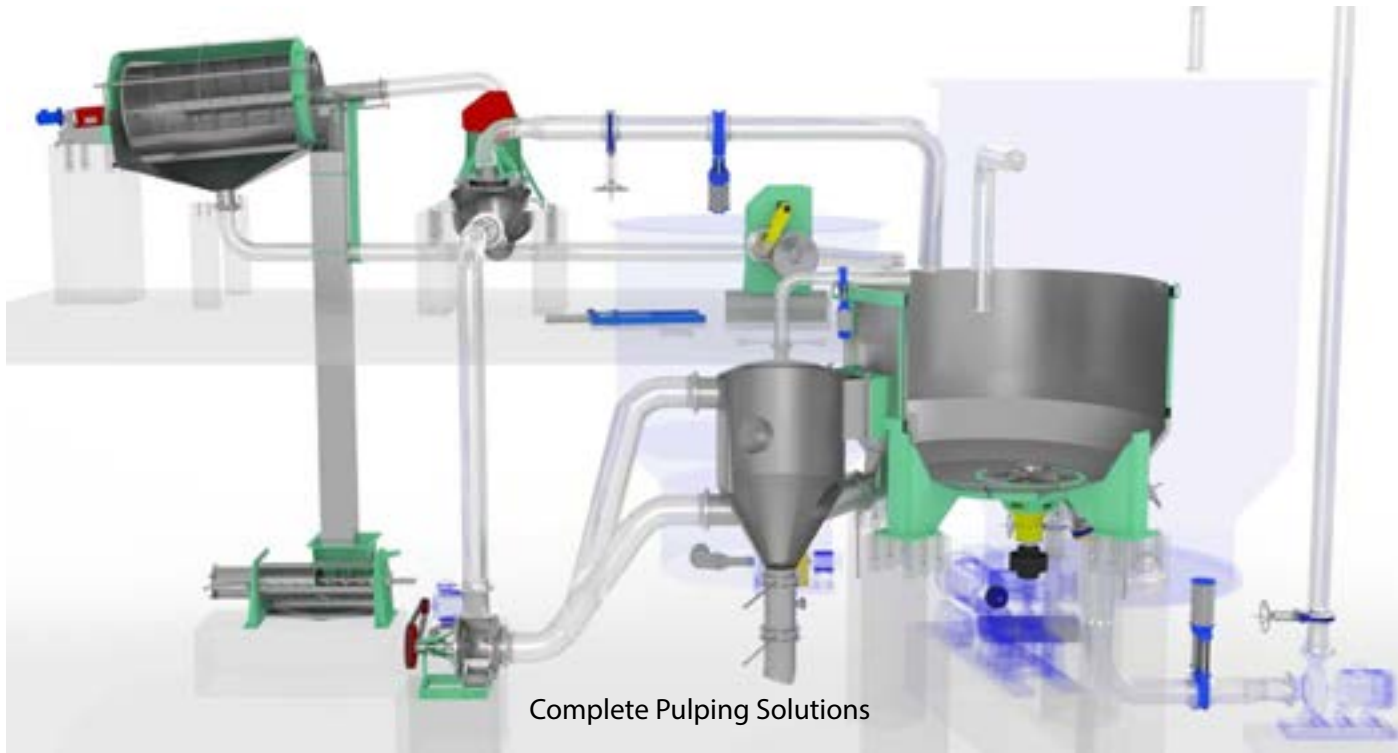

Our Vision

Become the first choice and most trusted company for mechanical engineering,electrical service and supply.

Our Mission

-  Providing high quality product and service at reasonable price
-  Providing a fast and accurate response to our costumer’s request
-  Extend and expand our business with global manufactures

Product List

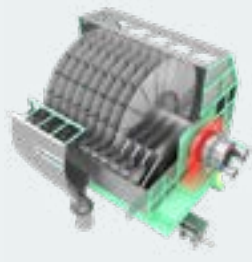

Complete Pulping Solutions

Pulp and Paper Solutions

Official Agent of Parason

Complete Cleaning Solutions

Complete Pulp Thickener Series

Pulp and Paper Solutions

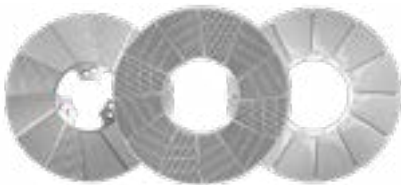

Official Agent of Parason

MDF Refiner Plate Design

Refiner Plates

Refining & Deflaking Technology

Vertical & Horizontal Agrigators System

Effluent Treatment Plant & CBG Bio CNG

Head Box

Molded Fiber Products

Dispersion & Deinking System

Screen Basket

Screening Solution

Complete Pulping Systems for White Paper Mills

Parason Agro and Wood Pulping

Conveyor Products

Official Agent of RUD India

Drag Chain Conveyor 500TPH

ESP Scraper Conveyor

Single Strand Conveyor

RUD Forky 170 - 1700 KN

Sprocket 6 - 14 Teeth

Chain Bucket Elevator

Multistrand Conveyor

Mineral Feeder

Reversible Conveyor

Bunker Discharge

Lifting Products

Official Agent of RUD India

Paper Roll Lifting - 5 Ton

Paper Sheet Lifting - 5 Ton

Paper Sheet / Pallet Lift - 5 Ton

Roll Lifting Beam - 10 Ton

Roll Lifting & Turning Beam - 30 Ton

Roll Lifting & Turning Beam - 5 Ton

Motorized Coil Tong

C-Hook - 40 Ton

Drum Lifting - 500 Kg

Container Loading Beam

Pumps

Official Distributor of Sampumps

Slurry Pumps - Twin Casing (AR)

Operating Range
Size: DN 50 to 400 mm
Capacity: Up to 2000m3/hr
Head: Up to 60 m
Temperature: Up to 11000 C
Pressure: Up to 25 bar

Application
Liquid containing abrasive and coarse grained solids, sand water mixtures and other related slurry.

Pulp & Paper Stock Pump

Operating Range
Size: DN 32 to 350 mm
Capacity: Up to 2250m3/hr
Head: Up to 80 m
Temperature: Up to 1400C
Pressure: Up to 22 bar

Application
For handling paper stock and pulp up to 70% consistency. Suitable fot heavily contaminated liquids.

Chemical Pumps (CPC)

Operating Range
Size: DN 32 to 200 mm
Capacity: Up to 750m3/hr
Head: Up to 150 m
Temperature: Up to 2000 C
Pressure: Up to 22 bar

Application
Used in the chemical, petrochemical, acids, aggresive products and inorganic and organic products industry.

Process Pump (TCH+N)

Operating Range
Size: DN 25 to 200 mm
Capacity: Up to 700m3/hr
Head: Up to 180 m
Temperature: Up to 2000 C
Pressure: Up to 26 bar

Application
The offered process pumps are designed to handle all liquid such as Akalis, acids, starch, filtrate etc.

Horizontal Split Case Pumps (ZM)

Operating Range
Size: DN 50 to 700 mm
Capacity: Up to 4000m3/hr
Head: Up to 140 m
Temperature: Up to 2200 C
Pressure: Up to 40 bar

Application
Used for multitude operations such as pumping crude oil, oil and hydrocarbons. River water, hot water and black water.

Vertical Sump Pumps (VO)

Operating Range
Size: DN 25 to 300 mm
Capacity: Up to 900m3/hr
Head: Up to 120 m
Temperature: Up to 1200 C

Application
Suitable for all clearr liquids, acids, alkalis, hydrocarbons, slurries, waste water, sugar melts and detergents.

Vertical Canti Lever Pump (VG)

Operating Range
Size: DN 25 to 300 mm
Capacity: Up to 500m3/hr
Head: Up to 75 m
Temperature: Up to 1200 C

Application
Corrosive application as intermediate bush bearings are avoided. Highly efficient, reliable, and reduces operating costs.

Multi Stage Pumps (MD)

Operating Range
Size: DN 40 to 125 mm
Capacity: Up to 350m3/hr
Head: Up to 600 m
Temperature: Up to 1200 C
Pressure: Up to 90 bar

Application
Suitable boiler feed water service, condensate extraction and for general water and fire-fighting system.

API Process Pumps 7th Edition (SVN)

Operating Range
Size: DN 25 to 250 mm
Capacity: Up to 1000m3/hr
Head: Up to 300 m
Temperature: Up to 4500 C
Pressure: Up to 60 bar

Application
Process industry and transfer system. It is suitable for refineries, oil and gas fields, chemical and petrochemical industry.

Split Case 2Stages (TU)

Operating Range
Size: 8mm to 200 mm
Capacity: Up to 600m3/hr
Head: Up to 125 m
Temperature: Up to 1250 C
Pressure: Up to 20 bar

Application
For handling paper stocks and pulp up to 8% consistency. Suitable for heavily contaminated liquids.

Vacuum Pumps

Official Distributor of Kakati Pump

KV Series

Operating Range
Range: 0-27+ Hgvac / to 100 mbar abs
Diff Pressure: 1 Bar
Compressor Pressure: 2 Bar abs
Construction Material: Cast Iron, Stainless Steel

Application
Paper Machine Dewatering, Autoclaves, Carburettor Testing, Chucking, Condenser Air Removal

K Series

Operating Range
Range: up to 710 mmHg
Capacity: Up to 22500m3/hr
Compressor Pressure: 2 Bar abs
Construction Material: Cast Iron, Stainless Steel

Application
Textile, Mining, Paper, Sugar, Tobacco, Food, And Other Process Industries

KEN-Series

Operating Range
Range: up to 710 mmHg
Capacity: Up to 21000m3/hr
Compressor Pressure: 2 Bar abs
Construction Material: Cast Iron, Stainless Steel

Application
Designed To Operate In The Harshesht Environments Like Paper, Power, Mining And Chemical Process Industries.

Pre-Separator

Water Handling lpm by Model:
• KPS 45 / 500 LPM / 5HP
• KPS 90 / 1200 LPM / 7.5HP
• KPS 100 / 2200 LPM / 10

Advantages: Positive prime, flange-mounted, eliminates suction piping, swing-out hinge, V-belt drives, corrosion-resistant and partially sealed,lubricated bearings.

KXL-Series

Operating Range
Range: up to 720 mmHg
Differential Pressure: 2 Bar
Capacity: Up to 7000m3/hr
Compressor Pressure: 2 Bar abs
Construction Material: Cast Iron, Stainless Steel

Application: Ideal for applications requiring discharge against positive back pressure. Widely used in the chemical industry, they are designed for harsh environments.

KTC-Series

Operating Range
Range: up to 740 mmHg
Capacity: Up to 4000m3/hr
Compressor Pressure: 2 Bar abs
Construction Material: Cast Iron, Stainless Steel

Application
Some of its main applications include condenser evacuation system and black liquor evaporation.

2KE4-Series

Operating Range
Range: up to 710 mmHg
Capacity: Up to 35000m3/hr
Compressor Pressure: 2.5 Bar abs
Construction Material: Cast Iron, Stainless Steel

Application: More efficient, versatile inlet/outlet options for easy piping. Used in diverse industries, vacuum of up to 300 mmHg or 400 mbar Abs with a center shroud.

KDS-Series

Operating Range
Range: up to 740 mmHg
Capacity: Up to 5000m3/hr
Compressor Pressure: 2 Bar abs
Construction Material: Cast Iron, Stainless Steel

Application
Common applications include turbine condenser evacuation, black liquor evaporation, vacuum distillation.

KSC-Series

Operating Range
Range: up to 720 mmHg
Differential Pressure: 1 Bar
Capacity: Up to 2200m3/hr
Compressor Pressure: 2 Bar abs
Construction Material: Cast Iron, Stainless Steel

Application: Single cone liquid ring pumps/compressors, widely used in the chemical industry, endure harsh conditions. Available in ductile iron and stainless steel, they accommodate various seals.

KVC-Series

Operating Range
Range: up to 740 mmHg
Differential Pressure: 1 Bar
Compressor Pressure: 2 Bar abs
Construction Material: Cast Iron, Stainless Steel

Application: Used primarily in evaporation and turbine condenser vacuum applications. These pump can be run for very long periods between overhauls.

Flexible Joint

A flexible component designed to absorb movement from temperature changes, pressure, or vibrations, protecting systems from damage and enhancing durability.

Expansion Joint Metal

SS304 - SS316 - SS321

- Application** : Oil & Gas, Exhaust System, Steam Lines
- Type Connection** : Welded End, Fixed Flange or Loosed Flange
- Standard** : EJMA Standards
- Pressure** : Medium Pressure
- Temperature** : High Temperature
- Shape** : Round, Rectangular, Square, Oval, Etc

Expansion Joint Fabric

- Application** : Pulp and Paper Industry, Power Plant, Food Industries, Flue Gas Duct, Gas Turbine Exhaust, Exhaust Gas and Air, Heat Recovery
- Type** : Single Layer, Composite Layer
- Connection** : Welded End, Clamp, Flange Type
- Pressure** : Low Pressure
- Temperature** : High Temperature
- Shape** : Round, Rectangular, Square

Expansion joints are available in various types and materials, such as metal, rubber, and fabric, to suit different industrial needs. They are commonly used in pipelines, ducting systems, and equipment to manage thermal expansion, misalignment, and mechanical vibrations. By reducing stress on system components, expansion joints contribute to improved safety, efficiency, and maintenance reliability.

Expansion Joint Rubber

EPDM - Viton - NBR

- Application** : Liquid Industries, Mechanical Installation, Air Compressors, Water Application.
- Type** : Single Spehere, Double Sphere
- Connection** : Flange, Clamp
- Pressure** : Medium Pressure
- Temperature** : Medium Temperature
- Shape** : Round, Rectangular, Square

Expansion Joint PTFE

- Application** : Chemical and Fertilizer Plants, Petrochemical, Instrumentation, Valve, Pump, Etc
- Type** : Basic, Complete Ring Vacuum, Etc
- Pressure** : Medium Pressure
- Temperature** : Medium Temperature
- Material Flange** : Carbon Steel, Stainless Steel

Flexible Metal Hose

SS304 - SS316 - SS321

- Application** : Steam, Vacuum Pipe, Heat Expansion, Vibration
- Fittings** : Steel, Stainless Steel, Copper, Brass, or Non Standards.
- Pressure** : High Pressure
- Temperature** : High Temperature
- Material Flange** : Single, Double, Triple Braided

Sealing Products

Official Distributor of Champion

Sheet Gasket (PTFE, NBR, Aramid, FKM, NR, Etc)

Spiral Wound Gasket (304, 316, PTFE Filler, Graphite Filler, Etc)

Oil Seal (FKM, NBR)

O-Ring / O-Ring Cord (FKM, NBR)

Kamprofile / Groove Gasket (Titanium, Stainless Steel)

HE Gasket / Metal Jacketed Gasket

PTFE + EPDM Vulcanized Gasket

Non Metal Ring Gasket

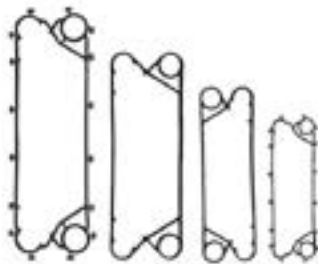

Plate Heat Exchanger Gasket

Spring Energized Seal (PTFE, Carbon PTFE, Stainless Steel Spring)

Gland Packing (PTFE, Graphite, Carbon, Aramid, Etc)

Mech Seal

Corrosion & Abrasion Protection

Protect your assets from corrosion with our advanced materials. Each solution offers superior performance and longevity in diverse environments, minimizing downtime and maximizing your return on investment.

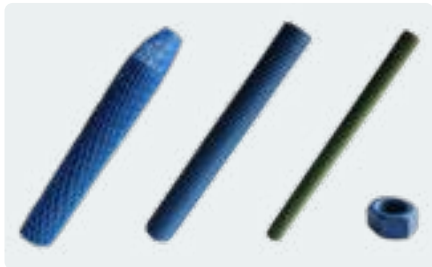

PTFE Lining

Key Features: TFE lining provides excellent chemical resistance, withstands temperatures up to 260°C, has a non-stick, low-friction surface, and is non-toxic.

Benefits: It prevents corrosion and contamination, extends equipment life, reduces maintenance, and ensures product purity.

Applications: Ideal for chemical tanks, food and pharma equipment, pipelines, and corrosive fluid systems.

PTFE/Teflon Coating

Key Features: Exceptional chemical inertness; High-temperature resistance (up to 260°C); Low friction; Non-stick properties; Easy to clean.

Benefits: Prevents corrosion & contamination; Extends equipment lifespan; Reduces maintenance; Improves process efficiency; Maintains product purity.

Applications: Chemical processing; Food processing; Pharmaceutical manufacturing; Electrical insulation.

Ceramic Coating

Key Features: High hardness, Excellent thermal stability, Superior corrosion resistance, Abrasion resistance, High temperature tolerance.

Benefits: Extends component life; Reduces wear & tear; Maintains performance under extreme conditions; Improves fuel efficiency (in automotive applications).

Applications: Aerospace; Automotive; Industrial machinery; Power generation.

Ceramic Lining

Key Features: Exceptional wear resistance; Excellent chemical resistance; Long lifespan; Resistant to impact; Smooth surface for easy cleaning.

Benefits: Minimizes downtime; Reduces maintenance costs; Ensures process reliability; Protects against aggressive chemicals; Increases product yield.

Applications: Mining; Pulp & paper; Wastewater treatment; Chemical processing.

Rubber Lining

Key Features: High flexibility, Excellent impact resistance, Superior corrosion protection, Easy to install, Good abrasion resistance.

Benefits: Protects against abrasion & impact; Extends equipment life; Handles irregular surfaces; Cost-effective solution; Reduces noise and vibration.

Applications: Storage tanks; Pipelines; Chutes & hoppers; Wastewater treatment.

FRP Lining

Key Features: Lightweight yet strong; Excellent corrosion resistance; High tensile strength; Customizable thickness and shapes; Resistant to impact and abrasion.

Benefits: Extends the lifespan of equipment; Reduces maintenance and replacement costs; Versatile applications in various industries; Easy installation and repair; Cost-effective long-term solution.

Applications: Chemical storage tanks; Wastewater treatment facilities; Piping systems in corrosive environments; Pulp and paper processing.

Heat Transfer

A heat exchanger is a device that transfers heat from one fluid to another. It allows for the efficient transfer of thermal energy from one fluid to another without allowing them to mix or come into direct contact with each other.

Heat exchangers can be found in many different forms and are used in a wide range of applications, including HVAC systems, power plants, automobiles, and refrigeration systems. The design of a heat exchanger can vary greatly, depending on the application, but the basic principle remains the same: to transfer heat from one fluid to another with maximum efficiency and minimum heat loss.
